

After and Before Method in jQuery

After Method

The after() method inserts specified content after the selected element.

Example

Insert content after each <p> element:

```
$("#button").click(function(){
    $("p").after("<p>Hello world!</p>");
});
```

Before Method

The before() method inserts specified content in front of (before) the selected elements.

Example

Insert content before each <p> element:

```
$("#button").click(function(){
    $("p").before("<p>Hello world!</p>");
});
```

Source Code:

```
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>After & Before Method </title>
    <style>
        .box {
            width: 300px;
```

```

        height: 300px;
    }

    #test1 {
        background-color: aqua;
        border: 2px solid black;
        overflow: auto;
        padding: 10px 10px;
    }

    .bg_red {
        background-color: red;
    }
</style>
<script src="jquery-3.7.1.min.js"></script>
</head>

<body>
