

Set Method in jQuery

Set Content - text(), html(), and val()

We will use the same three methods like **Get Method**:

- text() - Sets or returns the text content of selected elements
- html() - Sets or returns the content of selected elements (including HTML markup)
- val() - Sets or returns the value of form fields

The following example demonstrates how to set content with the jQuery text(), html(), and val() methods:

Example

```
$("#btn1").click(function(){
    $("#test1").text("Hello world!");
});
$("#btn2").click(function(){
    $("#test2").html("<b>Hello world!</b>");
});
$("#btn3").click(function(){
    $("#test3").val("Dolly Duck");
});
```

Set Attributes - attr()

he attr() method also allows you to set multiple attributes at the same time.

The following example demonstrates how to set both the href and title attributes at the same time:

Example

```
$('#btn').click(function() {
```

```
$('#test1 h1').attr("class", "bg_red");  
});
```

Source Code:

```
<!DOCTYPE html>  
<html lang="en">  
  
<head>  
  <meta charset="UTF-8">  
  <meta http-equiv="X-UA-Compatible" content="IE=edge">  
  <meta name="viewport" content="width=device-width, initial-scale=1.0">  
  <title>Set Method </title>  
  <style>  
    .box {  
      width: 300px;  
      height: 300px;  
    }  
  
    #test1 {  
      background-color: aqua;  
      border: 2px solid black;  
      overflow: auto;  
      padding: 10px 10px;  
    }  
  
    .bg_red {  
      background-color: red;  
    }  
  </style>  
  <script src="jquery-3.7.1.min.js"></script>  
</head>  
  
<body>  
  
  <h1>Set Method in jQuery</h1>  
  <div class="box Box" id="test1">  
    <h1>Box Dev</h1>
```

```
    <p>Lorem ipsum dolor sit, amet consectetur adipisicing elit. Esse quia  
quasi expedita fssimus eum dolor. Iure adipisci voluptates esse cupiditate sunt  
nostrum! .
```

```
    </p>
```

```
</div>
```

```
<button id="btn">Click Now</button>
```

```
<form id="sform">
