

## AppendTo and PrependTo Method in jQuery

### AppendTo Method

The appendTo() method inserts HTML elements at the end of the selected elements.

Example

Example

Insert a <span> element at the end of each <p> element:

```
$("#button").click(function(){  
    $("<span>Hello World!</span>").appendTo("p");  
});
```

### PrependTo Method

The prependTo() method inserts HTML elements at the beginning of the selected elements.

Example

Insert a <span> element at the beginning of each <p> element:

```
$("#button").click(function(){  
    $("<span>Hello World!</span>").prependTo("p");  
});
```

### Source Code:

```
<!DOCTYPE html>  
<html lang="en">  
  
<head>  
    <meta charset="UTF-8">  
    <meta http-equiv="X-UA-Compatible" content="IE=edge">  
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
