

jQuery event.type Property in jQuery

Event Type Property

The event.type property returns which event type was triggered.

Example

Return which event type was triggered:

```
$("#p").on("click dblclick mouseover mouseout", function(event){  
    $("#div").html("Event: " + event.type);  
});
```

Source Code:

```
<!DOCTYPE html>  
<html lang="en">  
  
<head>  
    <meta charset="UTF-8">  
    <meta http-equiv="X-UA-Compatible" content="IE=edge">  
    <meta name="viewport" content="width=device-width, initial-scale=1.0">  
    <title>Event Type Property in jQuery</title>  
    <style>  
        .box {  
            width: 300px;  
            height: 300px;  
  
        }  
  
        #test1 {  
            background-color: rgb(130, 143, 143);  
            border: 2px solid black;
```

```
        overflow: auto;
        padding: 10px 10px;
        position: relative;
    }

</style>
<script src="jquery-3.7.1.min.js"></script>
</head>

<body>

    <h1> Event Type Property in jQuery</h1>
    <div class="box" id="test1">

        </div>

<h2></h2>

    <script>
        $(document).ready(function () {
            $('#test1').on("Click Mouseover Mouseout",function(event){
                $('h2').html("Event:"+event.type);
            });

        });
    </script>
</body>

</html>
```
