hasClass Method in jQuery

hasClass Method

The hasClass() method checks if any of the selected elements have a specified class name.

If ANY of the selected elements has the specified class name, this method will return "true".

Example

Check if any <p> element has a class named "intro":

```
$("button").click(function(){
  alert($("p").hasClass("intro"));
});
```

Source Code:

```html
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>hasClass Method in jQuery</title>
    <style>
        .box {
            width: 300px;
            height: 300px;
        }

        #test1 {
            background-color: aqua;
            border: 2px solid black;
            overflow: auto;
            padding: 10px 10px;
```

```
        }

    </style>
    <script src="jquery-3.7.1.min.js"></script>
</head>

<body>

    <h1> hasClass Method in jQuery</h1>
    <div class="box" id="test1">
        <h1>Box Dev</h1>
        <p>Lorem ipsum dolor sit, amet consectetur adipisicing elit. Esse quia
quasi expedita fssimus eum dolor. Iure adipisci voluptates esse cupiditate sunt
nostrum! .
        </p>

    </div>

    <button id="btnHasClass">hasClass</button>

    <script>
        $(document).ready(function() {
            $('#btnHasClass').click(function() {
            console.log($('#test1').hasClass('box'));
            console.log($('#test1').hasClass('Box'));
             })

        });
    </script>
</body>

</html>
```
