Clone Method in jQuery

Clone Method

 The clone() method makes a copy of selected elements, including child nodes, text and attributes.

Example

Clone all <p> elements and insert them at the end of the <body> element:

```
$("button").click(function(){
  $("p").clone().appendTo("body");
});
```

Source Code:

```html
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Clone Method in jQuery</title>
    <style>
        .box {
            width: 300px;
            height: 300px;
        }

        #test1 {
            background-color: aqua;
            border: 2px solid black;
            overflow: auto;
            padding: 10px 10px;
        }

        #box2 {
            background-color: red;
        }
    </style>
    <script src="jquery-3.7.1.min.js"></script>
```

```
</head>

<body>

    <h1> Clone Method in jQuery</h1>
    <div class="box" id="test1">
        <h1>Box Dev</h1>
        <p>Lorem ipsum dolor sit, amet consectetur adipisicing elit. Esse quia
quasi expedita fssimus eum dolor. Iure adipisci voluptates esse cupiditate sunt
nostrum! .
        </p>

    </div>

    <button id="btnClone">Clone</button>
    <div id="box2">
        <p>This is a paragraph </p>
    </div>

    <script>
        $(document).ready(function() {
            $('#btnClone').click(function() {
                $('#test1 h1').clone().prependTo('#box2');
                $('#box2 p').clone().appendTo('#box2');
            })

        });
    </script>
</body>

</html>
```
